RWJF Evidence for Action: Investigator-Initiated Research to Build a Culture of Health

Description:
Evidence for Action (E4A), a national program of the Robert Wood Johnson Foundation (RWJF), funds research that expands the evidence needed to build a Culture of Health. A Culture of Health is broadly defined as one in which good health and well-being flourish across geographic, demographic, and social sectors; public and private decision-making is guided by the goal of fostering equitable communities; and everyone has the opportunity to make choices that lead to healthy lifestyles. RWJF’s Culture of Health Action Framework, which was developed to catalyze a national movement toward improved health, well-being, and equity, guides E4A’s program strategy.

E4A’s mission is to support rigorously designed quantitative, qualitative, and mixed-methods research that yields convincing findings about the population health, well-being, and equity impacts of specific policies, programs and practices. We primarily target research that directly tests the impacts of interventions on health outcomes. Evidence generated through E4A should be useful to practitioners and policymakers in making decisions, setting priorities, and allocating resources. Accordingly, projects we fund should yield findings that are generalizable to other sites and/or populations. We are especially interested in research examining the health impacts of program or policy interventions that address factors outside the domain of health care services or public health practice.

Sponsor: Robert Wood Johnson Foundation (RWJF)

Solicitation link: https://www.rwjf.org/en/library/funding-opportunities/2019/evidence-for-action-i...

Funding amount:
Sponsor deadline: Monday, July 1, 2019

Other information:
As a research funding program, E4A does not fund the costs of program implementation or operations. Also, in line with E4A’s focus on evaluating interventions, we do not fund descriptive or exploratory science, literature reviews, needs assessments, or validation of screening tools.

There is not an explicit range for allowable budget requests. You should request the amount of funding you will need to complete your proposed research project – including both direct and indirect costs for the entire duration of your study. Typical grant durations may be up to 36 months, with some exceptions when durations of up to 48 months are justified.
