Program Overview
The Graduate Certificate in Gifted Education prepares teachers, school administrators, school psychologists, behavior analysts, and family members to work effectively with gifted children.

Students will gain the theory and pedagogy needed to identify and serve gifted children and the knowledge and skills required to develop and provide the most current instructional methods and services for their gifted students. Graduates will also learn how to create gifted programs based on the needs of their school district and learn how to work with administrations, school boards and parents.

Faculty understand gifted students require differentiated instruction and teach how to develop and reach their potential. Graduates of the program will learn how to be an advocate in their own schools for gifted students and gain the tools to identify potential and address specific needs of students that are either talented or gifted.

The program is good for public or private teachers in honors classrooms and those who want to add value to marketability as well as administrators focused on becoming gifted coordinators.

This 15-credit hour certificate program consists of 5 classes. The graduate certificate can be completed within a two-year period while concurrently pursuing an online graduate degree or as a stand-alone certificate. A Master of Education in Curriculum and Instruction: Gifted Education is also available.

The program provides the 12 semester hours of coursework in gifted education required for the gifted education (K-12) endorsement from the Arizona Department of Education. Students should refer to the Arizona Department of Education website for additional requirements.

Non-Arizona residents, please refer to the ASU Online State Authorization Information page for additional information.
